We will discuss the genesis of his publication, his findings and, by examining current areas of regulatory focus, whether the report recommendations came to fruition.

**Risk, Compliance, Legal and Audit** – A main tenant of any control function is the maintenance of independence and objectivity. Yet, there is an abundance of overlap between the four key control functions. Defining accountabilities and maintaining role clarity between Risk, Compliance, Legal and Audit is critical, but so is ensuring that that messages and escalations are harmonized, all while controls are appropriately reviewed and oversight is accurately reported. This panel will help delegates understand how to ensure the knot of control is untangled.
