

PENETRATION TESTING

Wednesday, November 24, 2021 | 3:00 pm - 4:00 pm ET

SPEAKER BIOS

TYSON RAUCH

Manager of External Penetration Testing | Digital Boundary Group

Tyson Rauch is a Manager of External Penetration Testing at Digital Boundary Group with over 13 years of experience in various cyber security roles including technical, managerial, and architectural. He has in-depth experience in many areas including penetration testing, red teaming, social engineering, vulnerability management, PKI, privileged access management, and PCI compliance.

PAUL STAPLETON

Chief Technology Officer | Fidelity Clearing Canada

With more than 25 years of experience in the Canadian financial industry, Paul Stapleton brings an innovative approach and a pioneering attitude to Fidelity Clearing Canada (FCC) as its Chief Technology Officer.

Paul manages FCC's evolving technology strategy and the continual development of uniFide™, our fully integrated digital services platform. Paul and his technology team focus on the seamless implementation and delivery of new services, improving business efficiencies through the use of technology, and providing solutions to our clients that ensure technical alignment between our digital platforms and our clients' technology requirements.

Before joining FCC in 2017, Paul served as SVP, Information Technology, for investment dealer Dundee Securities, and as VP, Information Technology, for merchant banking firm Dundee Corporation. He graduated from Trinity College in the University of Toronto.
